

Infrastructure Services

The Robinson White Partnership has assisted developers in preparing and reconfiguring sites, and infrastructure works, on business parks and residential sites in the South West ranging from 4 acres to 130 acres.

Works are usually on a phased basis and include:-

- Reconfiguration of levels
- On-site utilities
- Off-site utility reinforcement
- Surface water attenuation
- Adopted and private gravity and pumped drainage systems

We carry out site viability reports including:-

- Budgets
- Programmes
- Development appraisals
- Identification of risk items

We provide the following services for both the concept and construction phases:-

- Project Manager
- Quantity Surveyor
- CDM Co-ordinator
- Site Waste Management Planner
